

Bukit Timah First Diversion Canal

N

Active, Beautiful, Clean Water (ABC Waters)

- Green community corridor featuring park facilities like benches, shelters and paths for jogging/cycling

The Bukit Timah First Diversion Canal is 3.2km long. Wetlands, rain gardens and resting areas were constructed in tandem with drainage upgrading works, which help convey 30% more rainwater.

Vegetated swale & sedimentation basin

- Improves water quality
- Reduces maintenance efforts
- Detains peak stormwater flow

Flood Resilience

- Convey rainwater to manage extreme weather caused by climate change
